

World Flags and Weather Symbols

Thank you for purchasing! This asset includes:

- **Flags of 237 countries in the world in SVG and PNG (1024 pixels wide) formats.**
- **Collection of 37 weather symbols in SVG and PNG (256 pixels wide).**

The SVG format is included in case you need to render the textures in a different resolution than the PNG provided. If you'll not be using the SVG files in your final project, remember to remove the svg folder from your project.

For any question or comment, please visit our support forum on <http://kronnect.com>

Using the flag collection in World Political Map or Strategy Kit assets

The names of the flag texture files equal to the country names used in our map assets so you can add flag icons or texture countries with their flag with minimal effort.

Assuming you use World Political Map Globe Edition, import the World Flags and Weather Symbols asset into your project. Then the code to texture the country surface with its flag would be:

```
// Get reference to the API
WorldMapGlobe map = WorldMapGlobe.instance;

// Choose a country
string countryName = "China";

// Load texture for the country
Texture2D flagTexture = Resources.Load<Texture2D> ("Flags/png/" + countryName);

// Apply texture to the country main region (ignore islands)
int countryIndex = map.GetCountryIndex(countryName);
map.ToggleCountryMainRegionSurface(countryIndex, true, flagTexture);
```

Please refer to the documentation of the map assets for more instructions on how to add sprites and markers to the map (eg. the weather symbols).

World Political Map Series & World Map Strategy Kit

World Political Map Series is a collection of advanced mapping assets for Unity. Used by many companies and agencies across the world to visualize data, resources, interact with the user, etc.

World Political Strategy Kit is a complete framework for building AAA strategy games, including cool 3D PBS dynamic viewport for map, hexagonal grid, path-finding, real elevation, and much more.
